

Dual Language

for Proximus, Belgium

Short description

G&D Dual Language application allows menu structure and the applications on the SIM to be displayed in different languages.

Operator benefits

- One SIM is suitable for customers with different languages
- Important feature in countries with more than one first language, and for pool handsets which are used by a multi-lingual team
- Only one application development for different languages necessary
- Increased revenue through mobile application usage
- Reduced logistic expenses

G&D's scope of products

- G&D Dual Language application
- Adaptation to the specific requirements of Proximus, Belgium

Used technology

- SIM Toolkit application (SAT)

Detailed description

The Dual Language application allows a subscriber to display the menu structure and use applications in his preferred language. When the subscriber activates the SIM for the first time, he will be prompted to select one of the predefined languages. From this time on, the SIM menu and all the applications on the card are displayed in the chosen language. Of course, the user can switch to the other language if necessary.

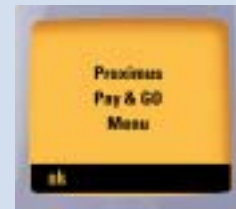

The multilingual functionality comprises the whole menu structure and the card applications.

1. Language selection

2. Confirmation

3. SIM menu in the chosen language
